

Form Input in Numbers

Use Experiment Journals in Numbers to input data collected from experiments

Activity

Creating an input form in Numbers which will populate a table in a Numbers sheet for data analysis and charting.

Objectives

Students will be able to capture their data and without manipulating other values in the table.

Extensions

Students can incorporate this feature into their journal to streamline their work processes with better segregation of duties.

Have a go

- 1 Open Numbers  and select from Education Templates: GPA Calculator, Dice Roll Probability or Correlation Project.

- 2 Edit the Title and text to suit your experiments.

- 3 Tap on the + button in Tab row to add a 'New Form' and select 'Correlation Project' to associate Input Form to table in selected sheet.

- 4 Input the data and add more instances if necessary
