

Social Studies - Performance Task

Exercising Reasoning

Activity

With the collected and organised data, students are to use the prompting questions set by the teachers to analyse the data. By answering the questions, students should be able to develop conclusions based on the data and to answer on the investigation questions.

Objectives

- Students can gather and organise information.
- Students can make observations using sources and interpret data.
- Students can consider different viewpoints and alternatives to make informed judgements.
- Students respect multiple perspectives of people from different cultural backgrounds.
- Students use evidence and adopt different viewpoints to explain his/her reasoning and decisions (CIT)

Extensions

- Teacher can set up SLS Thinking Routine for students to respond to their reasoning of collected data.

Have a go

- 1 Tap , join the Padlet via the QR code shared by the teacher  **JOIN A PADLET** .
- 2 Tap  under the column and add text response.
- 3 Images, links, search, take photos and upload drawing and voice can be use as part of the response to the Padlet post. 
- 4 Upon on the completion of the response, review and provide feedback to the others'.

To create an account, tap , choose shelf (stack content in a series of columns). Key in the title, description of the Padlet board in the settings , tap close when done. Tap Add Columns to add the heading for the column, once completed tap  and share the QR code with the students.
