

Factual Recount - AR for Learning

Activity

While studying the news article, students are to research and recreate the scene using AR Makr. Students are to record both the scene and narration concurrently for a 'news broadcast'.

Objectives

- Students demonstrate awareness of how meaning is conveyed through the appropriate voice qualities.
- Students can plan and present information and ideas for the assigned topic.
- Students can identify the expectations of the task/role and stay focused on them. (CIT)
- Students convey information and ideas coherently for specific purposes and contexts. (CCI)
- Students can put together specific media elements to construct a digital artefact, while acknowledging the source of information. (CCI)

Extensions

- Teachers can pre-share digital images and get students to set the AR scene accordingly. (e.g: retrieve information such as travel guide/paths according to the text given, students are to place the image according to the text).
- Students can create their own digital image in Keynote and export them into AR Makr as TIF files.

Have a go

- 1 Open AR Makr and choose the  to create own scene. Tap . Point the iPad to a flat surface. Move the iPad around until a grid appears on the surface – tap the grid when you are ready to start.
- 2 Tap  and  to access the Photo Library, adjust accordingly. Tap  to add image to your scene.
- 3 Move the iPad around to change the position, and pinch to resize the object. Tap  to add the object to your scene. Add more objects and characters to create the scene. Note: Hold  to add vertical placement control (moving objects up and down)
- 4 When you're finished, tap . Tap  to record. Tap  when completed. While recording, zoom and move your feet through your scene, telling your story.
- 5 Close camera and tap  to open your video in Photos.
