

BalikSG Lite

Research on latest farming methods in Singapore

Activity

Students will search on the internet the latest farming methods in Singapore

Objectives

Students will be acquainted with farming in Singapore and the reality of preserving our nation's food security.

Extensions

Consider widening the scope of farming to include fish farming which is highly applicable to Singapore as we are an island nation surrounded by water.

Have a go

- 1 Open Safari  and search for latest farming methods in Singapore.
- 2 Alternatively, one finger swipe down anywhere on the Home Screen without touching any app icon to launch Spotlight, key in your search terms and it will launch the browser.
- 3 Search on fish farming in Singapore, salt and fresh water aquaculture, algae, mushroom farming and even insect farming as an alternative protein source.
