

Create Township

Using Reality Composer to create a township

Activity

Students will use Reality Composer to construct a township of their design and also incorporate some green initiatives such as green spaces, wind / solar farm.

Objectives

Students can experiment with city planning and showcase their designs to the class in AR.

Extensions

Students can also experiment with automobiles and their associated noise and air pollution.

Have a go

- 1 Open Reality Composer , create a new project and select a Horizontal plane anchor.

- 2 To AR objects, tap + > Nature > to add trees, shrubs and mountains
> Weather > to add weather
> Houses > to add houses
> Locations > to add buildings and green parks

- 3 Tap on AR to cast your township into Augmented Reality

- 4 Export as a USDZ file to be shared on SLS / iCloud Drive
